

A man by the name of Hansen and a partner whose name we could not obtain, have been quietly at work in the Gila river canyon, a few miles above Christmas camp, sinking a shaft in shale and sandstone in the belief that they would develop coal in commercial quantity. Their expectations were realized last week. At a depth of 80 feet their shaft opened a seven foot vein of good blacksmith coal. The entire vein is not coal of that quality but it carries a sufficient quantity of such coal to make the strike a very important and valuable one. The quantity of this high-grade coal increases as they go in on the vein and there is but little doubt that the entire vein will become pay coal when they get further in on it. This coal find is about eight miles from the old coal fields developed by the Saddle Mountain Mining company, but the vein seems to trend in that direction and probably passes through said company's ground, at a considerable depth below the vein opened by Gen. Manager Chittenden. The vein opened by the latter is a splendid gas coal but not good for blacksmithing or steam fuel. The Saddle Mountain company will probably drill down to the level of the newly discovered vein and if they find it under their ground their fuel and coke problem will be solved. According to rumor the S. P. company is behind the discoverers of this new coal vein and will promptly extend the Phenix & Eastern track up to the find. The natural resources of Pinal county seem to be without limit as to variety. It has now been demonstrated that she has, in commercial quantity, almost every variety of useful mineral known to man and the development of paraffine oil and natural gas here is only a question of time. And she is as great as an agricultural, horticultural and stock growing region as she is peerless as a mineral area.—Florence Blade.

Good Ore in Graham County.

That there are some very rich deposits of ore yet undeveloped in Graham county is almost daily proven. W. H. Salisbury was in town the first of the week and brings information that a company is pushing development work on a group of about 100 claims located about fifteen miles from Mammoth and ten miles from Klondike in this county. Copper Creek is the name of the postoffice at this camp. Several men are employed in development work and are taking out some fine ore, assays from which show copper values ranging from 4 to 40 per cent with five ounces gold. An electric hoist is being installed. The workings have passed through the carbides into the sulphides. A 100-ton smelter for handling these ores has been ordered.—Safford Journal.

A New Drilling Record is Made.

A Spokane, Wash., dispatch says: McGilroy and Erickson of Sandon, B. C., won the first prize of 1,000 in a double hand drilling contest at the Spokane Interstate fair, driving the steel into fifty-three inches of solid rock in the time limit of fifteen minutes. Haff and Patterson of Osborne, Idaho, were second, with 51 14-16 inches; Dunee and Cola of Sumpter, Ore., third, with 51 1-4 inches; Yockey and Johnson of Goldfield, fourth, with 50 7-8 inches, and Nicholas and Pade of Butte were fifth, with 48 3-4 inches.

Ten thousand persons witnessed the contest. The performance by the winners is declared by veteran mining men to establish a new mark in public rock drilling contests.

Mining Property Sold.

The Boone copper property in Cunningham Pass, near Wendendale, has been sold to Nevada mine operators, who have ample capital and will at once inaugurate extensive development work. This is an old property, having been worked as long ago as 1863 by Cunningham, who discovered it, and for whom Cunningham Pass was named. Cunningham was killed by Apaches and the claims were relocated by the Bullard Bros., who sold them to Mr. Boone. The property has a shaft sunk to water level and the recent owners have been regularly shipping ore for several months. It is a gold-copper proposition and carries profitable values. When Cunningham worked the claims ore was shipped via the Colorado river and the ocean to Wales.—Yuma Sentinel.

Surveying Greene Gold-Silver Lands.

Arthur D. Young, who is in charge of the survey of the Mexican Govern-

ments mineral concession to the Greene Gold-Silver Company, as well as of the boundary survey of the Sierra Madre Land & Lumber Company, another of Colonel Greene properties, reports that his work will not be completed for another year.

Already more than a year has been spent on the work of surveying this imperial tract of more than 3,000,000 acres, and Mr. Young has the assistance of thirty men in his surveying party. The survey is an official one with Julio Posado of Chihuahua in the field as the Government's representative. All private surface rights are being marked as well as the boundaries.

Tarrying Not at Seattle.

Seattle, Oct. 12.—The management of the Alaska-Yukon-Pacific Exposition determined to have everything finished and in working order by June 1, 1909, the opening day, is busily engaged on the work on the grounds. All of the grading will be finished by January 1 and several of the large buildings well under way. The Administration building has been completed and occupied for several weeks. The management is fully aware that the success of the Exposition depends upon its being ready on time, and intends to take advantage of every minute of the twenty months it has in which to have the fair finished.

Douglas has built six school houses in five years, costing from 2,000 to 40,000 each, the total expenditure being 100,000. At the present time all school buildings are congested and several hundred children cannot be accommodated. Here is a demonstration of how this city has grown.

The Alaska-Yukon-Pacific Exposition will not ask Congress for a loan nor will it solicit any money for expenditure by the corporation. Uncle Sam will simply be asked to participate in the same manner as foreign governments and the different states.

The Best Doctor.

Rev. B. C. Horton, Sulphur Springs, Texas, writes, July 19th, 1902: "I have used in my family Ballard's Snow Liniment and Horehound Syrup, and they have proved certainly satisfactory. The liniment is the best we have ever used for headache and pains. The cough syrup has been our doctor for the last eight years." Sold by Watkins Drugstore.
